Updated Product Release

Interactive Safety Products announces the new Class G rating for our PAPR units

Our Pureflo model PF60 ESM meets the requirements for Class G Electrical Insulation...

Huntersville, NC, July 31, 2009: ISPI announces that the testing has demonstrated that our Pureflo model PF60 ESM has met the requirements for the Class G Electrical Insulation. All new Pureflo models, including those with the welding mask accessory, will be marked to identify conformity to ANSI Type 1, Class G classification.

Class G hard hats are intended to reduce the danger of contact exposure to low voltage conductors. Test samples are proof tested at 2200 volts (phase to ground).
